NUTRICIA METABOLICS RESEARCH FUND

Danone Medical Trading B.V., which encompasses Nutricia Metabolics, is fully dedicated and committed to the dietary management of patients with rare inborn errors of metabolism (IEM) and has been for more than 60 years, when initiated by SHS and Milupa Metabolics. Our unending mission to deliver the best possible care through products and services is intrinsically tied to the work of all healthcare professionals highly specialised in the management of patients with inherited metabolic diseases. Close collaboration with healthcare professionals making a difference to the prognosis and quality of life of affected patients has always been fundamental to our work.

The future of the field of dietary management of IEM has the opportunity to be further developed through realizing the many striking ideas related to both basic research and day-to-day management.

Thus it is a pleasure to announce the availability of 7 research grants in 2018, 1x €50,000 and 6x €20,000, as a clear sign of Nutricia's ongoing commitment to the management of IEM.

7 research grants in 2018 1x €50,000 and 6x €20,000

Each professional, including but not limited to dietitians, clinicians and post docs, working with an institution or company **active in the field of IEM can participate in this IEM grant application.**

This call seeks investigator-initiated projects (pilot trials, scientific research, pre-clinical, clinical studies) **related to nutrition and/or dietary management in the field of inherited metabolic diseases.**

Application forms are available online at

www.nutriciaresearch.com/growth-metabolism/inborn-errors-of-metabolism/

Your submitted form should provide a reasonable overview on the planned project as well as information on the applicant.

Forms require endorsement by the head of the metabolic centre/institution where the research shall be undertaken and must to be submitted as a pdf to the following email address:

metabolicsresearchfund@nutricia.com

Confidentiality of all submitted applications will be guaranteed. Deadline for submission is **Saturday July 14 2018.**

A group of senior metabolic experts will evaluate all applications and every applicant will receive feedback before end of November 2018.

With a proud heritage of more than 60 years, Nutricia aims to pioneer nutritional discoveries, based on the latest science and patient insights, to support patients with inborn errors of metabolism throughout their lives - this is part of our commitment to always deliver best care.
